Meta
SPECIAL AEROSPACE

Adaptation, Accelerated.

Core Capabilities

Airborne Intelligence, Surveillance, & Reconnaissance

ISR Design, Engineering, & Integration

Advanced Tactical Rotary Wing Training

Maintenance & Logistics Support

Custom Logistics Solutions for Sensitive Customers

Passenger Travel & Cargo Delivery

MSA has designed, improved, operated, and delivered high-reliability advanced multi-spectral airborne payloads and training for over 30 years.

From integrated C5ISR, to specialized rotary wing training, to special logistics, Meta Special Aerospace provides turnkey solutions and a constantly evolving set of capabilities to our trusted customers.

Meta Special Aerospace (MSA) operates globally and provides a full range of aerospace solutions out of three divisions: Airborne ISR, Vertical Applications, and Special Mobility.

- » More than 15 King Air B200/B350s, as well as a CL-604 and a CL-605 equipped with industry-leading technology including FMV, SIGINT, LOS, BLOS, and other proprietary systems.
- » Over 7,000 C5ISR missions flown, spanning over 125,000 mishap-free flight hours.
- » More than 15 years of experience providing special operations aviation training to the U.S. DoD and its allies.
- » Logistics solutions include a range of asset types, including fixed and rotary wing mobility.
- » Advanced tactical rotary wing assessments and training in support of SOATU development throughout Eastern Europe.

Meta Aerospace | Adaptation, Accelerated.

Meta delivers rapidly adaptive effects as-a-service to our multi-domain mission partners across C5ISR, mobility, and training.

Electromagnetic & Space Group (EMSG)

Meta Immersive Synthetics (MIS)

Ultimate fidelity, physics-based simulation and modeling across air, land, sea, and EMS domains.

Meta Orbital Effects (MOFX)

Space-based ISR using Synthetic Aperture Radar (SAR) satellites in Low Earth Orbit (LEO).

Meta Mission Data (MMD)

Designs and builds C4ISR solutions, TDL software and testing, data analytics, and information assurance services.

Meta Spectrum Operations (MSO)

Provides SI, EW, and cyber expertise, operational support, and training capabilities.

Meta Advanced Signals (MAS)

Designs and builds leading-edge secure communications and electronic warfare (EW) software and hardware systems.

Aviation Group (AVG)

Meta Special Aerospace (MSA)

Turnkey ISR-as-a-Service, special mobility, and special operations rotary wing training.

Meta Aviation Services (MAVS)

Flight services, technical services, and aerospace engineering services.

Meta Strategic Mobility (MSM)

Air-to-air refueling operations using proprietary Meta-owned KC-135R tankers.
