Connects To Blender

BLENDER BUDDY 2

The **Blender Buddy 2** turns your blender into the ultimate blending device and is backed by a **three-year warranty**. Its robust design provides the quality and reliability needed to ensure the ultimate patient care. This product securely attaches to your blender using its DISS outlet connection. The oxygen port on the top of the manifold allows gas to be analyzed. Add the MaxO2 ME for applications requiring continuous monitoring.

MAXBLEND 2

Maxtec offers the Low-Flow and High-Flow **MaxBlend 2** with a built-in monitor that allows you to measure oxygen percentage in a clean and dry environment, away from the patient. This easy-to-use, low-maintenance blender has a host of new features and improvements, including a backlit LCD and acrylic flow meter, smart alarms, DC power port, extended battery life, and more—all backed by a **three-year warranty**.

ACCESSORIES

Be sure to add our **accessories** to your setup for a better method to flow delivery.

ADD TO A STAND-ALONE BLENDER

DFB FLOW METER

The Maxtec “DFB” flow meters are specifically designed to work with blenders. They are calibrated for the pressure drop that is associated with a blender as flow rates are increased. This is especially important in the world of high flow.

Every Maxtec **DFB flow meter** has a dual-scale, which essentially combines 2 flow ranges into 1 flow meter. Our Dual Taper allows accuracy from the lowest visible ranges, to higher flows. This eliminates the need for multiple flow meters attached to a blender.

MAXBLEND LITE

The **MaxBlend Lite** is designed to provide all of the features of our MaxBlend 2 to customers already using a stand-alone blender. When paired with your existing blender, the **MaxBlend Lite** provides you with the added features of a built-in O₂ monitor with high and low alarms, and a flow meter—all backed by a **three-year warranty**. This product securely attaches to your blender using a specific adapter block.
